

# T-USA Waist High ADA Gate

This heavy-duty swing gate is designed for heavy traffic and secure use, with an attractive appearance.

It can be custom made to fit your installation needs.

The base model includes:

- Round or square 14 gauge steel
- Heavy duty, low profile, self-closing, adjustable hinges to assure quieter operation and prolong product life
- Stop post and striker plate
- Standard 36" passage; overall width of 43"
- Longer posts for cored sinking

## OPTIONS

- Powder coat over steel
- Stainless steel
- Glass panels on the partitions and gate
- Any size partition or rail system to secure the entire area
- Field selectable 24V or 12V DC 800 lb. magnetic lock for use with access controls
- Hydraulic self-closing hinge with or without snap lock
- Floor anchors for surface mounting

High quality stainless steel gate with partition, set on concrete with magnetic lock and self-closing hinges.
